Command-line scripting: AutoCAD Crack Keygen supports the use of a command-line in scripts, in which case the scripts are run by using the run command. Autodesk Exchange Apps for Web (AXW), is a web-based software application that makes the design process faster and easier. AXW's interface is divided into three main areas: Editor - a design window with a 2D and 3D drawing area. The user can draw objects, modify existing objects, or use predefined drawing templates. The drawing can be saved as an image or in a DXF file. Designers can create a perspective view, plan view or section view. Design View - the design window where the user can build the drawing. The user can attach drawing, annotation, raster image, text, element, etc. Object Browser - an index of all the objects in the drawing. Designers can browse through all the objects and see their properties in details. They can also view all the objects in the drawing by choosing the Show Hidden Objects option from the View menu.
