AutoCAD is in its 40th revision (2018). According to Autodesk, as of November 2018, AutoCAD was installed on more than 57 million desktop computers worldwide. Autodesk estimated in 2017 that AutoCAD users created over 10 billion 3D models and produced over 15 million drawings in each year.

In 2019 Autodesk forecast that AutoCAD would be installed on more than 63 million desktops by year's end, up from 56 million in 2018. The company also estimated AutoCAD to be installed on approximately 60% of the world's desktop computer users, even though most of the software's functions could be performed on any PC with a graphics adapter and Windows operating system. Support for the read-only Database Direct Access (DDA) data store, a C++/C# class library, enables C++, VB, and C# applications to store and retrieve data from databases. This technology works with AutoCAD Cracked Accounts, as well as other DDA-compliant applications such as Microsoft Excel, and Visio. AutoCAD supports XML databases, such as dbExpress, XMLWorks, and XDB. Legacy and unofficially supported APIs AutoLISP AutoLISP (AutoCAD Lisp) is a Lisp-like language based on Harvard Lisp (the original AutoCAD language) and CLOS. The original AutoLISP introduced in AutoCAD 2000 was partially replaced by Visual LISP in AutoCAD 2007. The Visual LISP was forked as well and continued to be developed after AutoCAD 2007 as Visual LISP-3D. Visual LISP-3D Visual LISP-3D is based on Visual LISP. It is also based on CLOS, adding support for objects, inheritance and class methods. It was released in 2005, before AutoCAD 2009, and has subsequently had various incompatible updates. As of 2011, it still requires AutoCAD 2006 or 2007, or more specifically a binary version of AutoCAD 2006 or 2007, to be installed. When not installed, it displays a warning message in the Start menu. Visual LISP-3D supports 3D drawing and editing, including 3D modeling and 3D file manipulation and editing. Its own rendering and analysis capabilities are also significant. AutoCAD 2008 and AutoCAD LT 2008 AutoCAD 2008 introduced an new object-oriented programming interface called AutoLISP, replacing the old Harvard Lisp programming environment. AutoLISP has many similarities to Visual LISP. AutoLISP is a scripting language, but unlike Visual LISP it does not use Lisp syntax. Visual LISP-3D Visual LISP-3D was a fork of Visual LISP that is no longer maintained. It uses AutoLISP as its basis but supports a number of unique features. In particular, it supports: Multiple views in a 3D application. Custom 3D meshes Custom 3D primitives Custom 3D solids Custom 3D surfaces Custom 3D drawings AutoCAD LT a1d647c40b
