Simple but intuitive appearance After a swift installation process, with no worthy of mention events, you can launch the utility and start working with it. It features quite a straight-forward user interface that makes it approachable for anyone wishing to convert pictures, while the intuitive functionality ensures you will not have to waste too much time in trying to figure it out. Load your photos and convert them in just a few clicks ImageZipper Image Converter allows you to add the photos that you wish to process, either individually or by loading an entire directory at once. For this, you need to browse through your computer and locate the targeted items, then add them to the application, as it does not offer support for drag and drop. Next, you can decide on a destination folder, while the 'Target Format' menu enables you to select the file extension that you need to obtain. Similarly, you can opt for the preferred DPI for the generated picture. ImageZipper Image Converter supports inputting and outputting ITHMB, PDF, PNG, TIFF, BMP, JPEG, GIF, JPG, ICO, HDR, JNG, PFM, PNM, TGA, WBMP, XBM, XBM and others. Resize, rotate or flip your pictures Optionally, you can 'Edit Source' files by resizing them to a certain width and height or flipping them horizontally / vertically, while also being able to rotate the files to a user-defined number of degrees. Moreover, you can apply text and image watermarks onto the photos. Useful batch photo converter In conclusion, ImageZipper Image Converter is an efficient and easy to handle piece of software whose main purpose is to let you turn pictures from one format to another, created mainly for bulk processes, in the attempt to spare you time and effort.
