The Air Force today named the woman who was accused of installing spyware in a deputy chief of staff’s smartphone, with the reasoning being that if she worked for the NSA, that made her a bad spy. “[T]he servicewoman, who was later identified as [redacted], who work[ed] for the Defense Security Service (DSS) ... was arrested by the FBI on 27 September 2017 for suspicion of violating federal law and committing computer fraud related to a mission the DSS was undertaking to protect against potential attempts to steal classified information from government systems,” the Air Force said. The woman was arrested, according to the Air Force, “after [she] was caught installing spyware on [redacted]’s cellphone.” And this “poor spy” believed she was working for the NSA, when, in fact, she worked for the Air Force’s DSS. Why would she do that? Well, to enable access to the phone’s microphone. According to the Air Force, “accessing the microphone allowed [redacted] to listen in on conversations and record audio captured from [redacted]’s telephone.” “In the case of [redacted]’s phone ... access to the microphone was granted by altering the phone software to enable it to ‘wake up’ silently,” the Air Force said, noting that the phone was turned on, but not in use, meaning it wasn’t active and unable to be picked up by nearby surveillance equipment. “This was done through a series of five long number sequences whose format was unknown to the operator at the time.” It’s certainly hard to imagine the reason for this guy to go to so much trouble. And, as the Air Force noted, this isn’t the first time someone has been accused of using spy
