AutoCAD LT, an open source version of AutoCAD, is available. History AutoCAD was originally developed in 1982 by Charles Simonyi of Simonyi Research as an inexpensive drafting package to compete with Dbase III. It evolved into the version of AutoCAD introduced in 1987 and became an Autodesk product in 1989. The first release version (AutoCAD 1.0) was not released until 1991. The Autodesk name was a trademark acquired from Autodesk Inc. in 2006 and is now used by Autodesk. AutoCAD was originally released for the Apple Macintosh, then in 1993 for the Windows PC platform. In 2004, the family of computers supported by AutoCAD came to include the iPad, with a beta version. In 2006, Autodesk released AutoCAD 2004 as a beta for Windows and as a beta for the iPad. This version was the first to include the iPad as a full-featured CAD application. During the Autodesk MAX conference in November 2009, Autodesk announced the release of AutoCAD WS 2010. AutoCAD WS 2010 is aimed at developers and architects and is a rebranded version of the earlier AutoCAD Exchange Apps. AutoCAD Exchange Apps is a program which includes a suite of approximately 15 AutoCAD, AutoCAD LT, and DWG Viewer applications that are run from a remote server on the Internet. In 2011, AutoCAD WS 2010 was replaced by AutoCAD WS 2011. AutoCAD WS 2011 is a web application intended for small to mid-sized business and government users. It is released as a free beta. The system requirements for Windows are at least version 7, for Macintosh at least version 10.8.5, and for the iPad at least iOS 5.0. The operating system support for these versions has since been dropped. AutoCAD WS 2011 AutoCAD WS 2011 is a rebranded version of AutoCAD Exchange Apps. The products included in AutoCAD Exchange Apps are: AutoCAD Civil 3D AutoCAD Electrical AutoCAD Web Office AutoCAD LT DWG Viewer AutoCAD Mechanical AutoCAD WS 2011 is currently available on Windows and Macintosh computers, with a beta version available for the iPad. The Windows version is also available for evaluation in the Evaluation Center. Autodesk MAX 2009 in Las Vegas had a first look a1d647c40b
