The Glittering Eye is a full-time 30-year veteran of the arts and entertainment business, traveling the world as an international visual media correspondent, visual production and art buyer and writer. She's also a DIY home-body who has converted the one-time fortress of a NYC apartment building into an eco-conscious haven. Artist's Statement I started this series of artworks with a 1950's orthopedic corset because I'm fascinated with the way medical technology, especially during the 1900's, had the power to magnify the female form. Instead of the corset literally constricting the body, it exaggerated the natural beauty of a woman's figure. My corset feels like a magical extension of me. It is the opposite of what I am, which is a fearful and strict medieval maiden. I keep this corset where I feel safe, at home. Like a talisman, an armor. It is my bed. It is me. I wear it in the shower, and it protects me from the water and steel. The corset protects me from the world. The images in this series are of a woman who has a strong will, but cannot control her body. She is imprisoned in her own form. She is too small. The corset, made of iron, allows her to be prisoner of the cage she lives in, while also revealing her

7. Darkroom Darkroom is designed with the same old rectangular shape, but with less information on it, but on the bright side, it's an application that's incredibly easy to use. Let's go over some interesting features and call it a wrap-up for now. Create PPT presentation slides You're forced to download slide templates from the app's web site, but they're interesting templates, to be sure. On the bright side, they aren't complicated to understand, and you can just grab the ones you need and drag them into your work. One of the templates in the package is a presentation slide template. Now, when you go to the process, you can see a nice little preview as a guide for how your new designs will look. You can easily modify the thumbnail, the heading, font, and text colors by simply dragging them around. Editing is easy as well, but you can't make any changes to the slide area itself. You can only crop, rotate, scale, recolor, and add layers to them. Everything else can be modified after saving the presentation. Save, print, and email If your presentation looks perfect, save it and move onto the next one. You can print the slides one by one, and if you need more flexibility with the output, you can print them in batches. You can also use the built-in email service to share with others. In conclusion Using the application can be pretty challenging at times, as there aren't too many options. On the bright

### What's New in the ABC Timetable?

ABC Timetable is a cool timetable design that you can use to create timetables for your kids. It provides you with a nice profile picture and a cover. Simple Timetable 2012-09-25 15:19:56 ASAP8. Francesco Timetable App 2012-09-18 17:49:15 I am Francesco and I am the President of ASAP8, is our only aim is to create our own timeline and make it unique.. Very important that the main aim of the app is to simplify the timetable and let it automatic so you can use the app as a journal or planner for you. There are many features that you can add but is also easy to use. There are two main options how to choose what you want to add. The first is through the preferences. There you can see all the possible features. The second option is the calendar that you can add into the app. The app is very simple to use and it looks beautiful. The designs are very original, for example in the first screen you can see three types of hand and the styles can be changed.
