#### Fifa 22 Features Key:

- **HyperMotion Technology** – Wielding FIFA Master’s unique ability to capture playing data directly from first-person player movements, psychological attributes, and tackling in uniquely intense real-world circumstances, this technology infuses every player, every action, every card and shot. This provides for a deeper experience and improves the way players look and move on the pitch.
- **Real Player Physiology** – FIFA 22 introduces two new ways for the on-pitch player to project their performance status – or not, based on gameplay in the new Progress system. You can choose in specific matches whether you want your player to play as normal or as “Physically Adequate.” Physically Adequate is best equipped to play as a designated sub, providing a valuable option for carefully planned break throughs and boosts.
