Aside from that, the game includes enhanced animations of players and the ball based on the collected data, while the player models are closer to those in motion capture suits. A motion capture-based version of the animation is used for both the player and the ball in a smaller number of cases. FIFA features over 350 new moves, and 1,000 new animations, including many in the Off-The-Ball department. The sound of the ball and the crowd has been expanded thanks to the new motion capture data. The in-game presentation has been improved to offer a new, improved menus, improved narration and the updated Pro Clubs. The new Update 7.0 version of FIFA introduces more than 150 new animations and sequences.

The pitch surfaces of the six different game modes have been improved too and the two new game modes (The Voyage and The Stars) are introduced in Update 7.0 as well. FIFA 21 Gameplay Highlights: FIFA 22 comes with three brand new game modes - The Voyage, The Stars, and MyClub - and one updated game mode - Seasons. The Voyage is a single-player mode with individual challenges that are performed by a single player in which he has to survive an ocean-going ship that is guided by a single path. The single player must build up and set out a course along the length of the ship in order to chart a path that leads to a goal. The Stars mode is a single-player mode that brings the thrill of real-world gameplay into the game. In the mode the player must complete various challenges in football stadiums around the world. MyClub, on the other hand, is a social club mode that allows you to create your own team, and play against your opponents. The gameplay in MyClub is controlled by real-world movements.

There is also an updated game mode called Seasons. The Seasons mode is a single-player mode featuring all the leagues available in FIFA 21 which were not available in FIFA 20 and offers a separate mode for each league. The game mode was first introduced in FIFA 17 and now in FIFA 21. The new Seasons mode also features all the international matches available in FIFA. The game mode will support all the leagues and international matches that have been released in FIFA 21 thus far, as well as UEFA's new UEFA Champions League.

What's new in Fifa 22:

- **FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.**
- **New ways to play with your friends include two brand-new head-to-head game modes - new created-content, Career, Playground Quick Cup, Online League, and Web Cup.**
- **New core gameplay features include more balanced Power Rank systems; new 'Skill Squads,' available in both real and FIFA Ultimate Team gameplay; and all-new Instant Game Hints system in Career Mode. FIFA 25 is the first title in the FIFA franchise to include an OAR-5 iDVR system.**
- **FIFA 22 introduced new RPG-like rewards and progression systems, including new Skills and Player Customization. Players have more ways to earn XP, unlock new attributes, improve skills, earn new tournaments, receive new items, and activate player classes. The new Amateur Game Feed allows players to earn rewards while playing on FIFA servers regardless of their platform of choice. FIFA 25 makes it easier to swap out players after you've made your team, with new 'Team Builder.' FIFA 22 introduced a simple in-game filtering system which has been updated for FIFA 25, ensuring that you are only able to register new players and clubs.**
- **The Driven Battle system now allows you to jump into challenges head-to-head with other players (even if they're on the same team). Driven Battles give you the**

opportunity to earn additional rewards and show off your in-game war credentials. You can also challenge other players in Custom Matches.

- FIFA 25 separates Training and Coaching modes and allows you to copy Winning Team Tactics to the Main Menu, giving you a quick way to get a jumpstart on your next game. FIFA 25 also introduces other new features, including friendlies, cup-leading reward packages, leagues, challenges, and player evaluations.

FIFA is the best-selling sports video game franchise of all time. EA SPORTS FIFA is a trademark of EA Canada. This article is published here by permission of EA. In Launched in September 1989, FIFA, the game that revolutionised sports gaming, has now sold more than 250 million copies worldwide. This year, FIFA 22 will include many additional features that will keep players engaged, entertained and challenged. This year, new features include an improved Player Impact Engine, new Player Intelligence, breakaways, Player Impact Engine adjustments and playable women and U.S. players. By incorporating these and many other innovations, FIFA 22 delivers deeper gameplay experiences that are even closer to the real thing. Improvements to the Player Impact Engine The Player Impact Engine (PIE) is a simulation feature that calculates how players will perform in the game and makes them physically move accordingly. Players can be in or near the box during a gameplay situation and they may physically receive a penalty, a player may be fouled and the resulting penalty is displayed. In addition, players can be in or near the penalty area, which affects how they perform in the gameplay situation. Throughout the PIE, players' skills such as their speed, pace, acceleration and control are factored into the equation. Players can be one hundred metres from the box and still be tracked and rewarded. Players are sensitive to the space in the penalty area. For example, a player has to be closer to the box to be tracked on a free-kick, making their performance more accurate. Additionally, a player moving closer to the penalty area can receive a penalty or even score. PIE also contributes to player-to-player interaction during gameplay. If a defender receives a last-minute penalty, the penalty is assessed and a player receives a free kick away from goal. While video analysis, Player Impact Engine and additional factors could

influence a penalty, one hundred per cent of the time the player will receive the penalty, irrespective of the other factors. This is because the risk-reward factor is weighted towards the player receiving the penalty. This is achieved by differentially weighing the factors using the PIE. For instance, if a player has completed a passing game with his teammates and he sees a defender receive a last-minute penalty, he automatically receives the penalty. The PIE calculates that if the defender receives the penalty, the player will score the goal. Therefore, the odds are in his favour. For
