Wondershare Dr.Fone Crack Registration Code is a program that you should have on hand at all times as it is often the.Q: Laravel - access a model method in another controller I want to use a function that calculates the distance between two points, and I want to make it as a method of a model, but I can't do that. I want to use the function to get the distance between two points: First I have a controller in which I make the query: public function distance(\$from, \$to) { \$points = DB::select('SELECT * FROM myTable WHERE longitude BETWEEN? AND?', array(\$from, \$to)); return \$points; } And here I call the function: public function getDistance(\$point1, \$point2) { \$distance = \$this->distance(\$point1, \$point2); return \$
