This is the private server of the Editor's Cut mod pack ( ).Q: How can I get a loop to stop when a DateTimeVar is empty? Question in the title basically. I have no idea why my loop keeps going when a DateTimeVar is empty. The user selects a date. I want to present a message to the user saying the date they've entered was not a valid date. I'm new to VBA and I've been stuck on this one for the past two hours. I have read some information about signal in case that's involved somehow, but I don't understand what I need to do with it. A: You can check if a date is valid by using the DateSerial() method of the Date type. Something like: If DateSerial(Date) > Date Then MsgBox ("Invalid Date") Exit Sub End If Or something like that. I'm not 100% sure of the syntax, though. Edit: There is a really nice and easy tutorial for this on MSDN. Fred Eisenberger Fred Eisenberger (January 3, 1899
