I'm playing shows, recording a new album, finishing off a book, working on new projects, and my wife and I are expecting our first child, so I haven't been a lot of help. Here's the answer to the question I didn't ask for: I think it's just that Hollywood gets into every genre and slants all the producers and directors to make them go in one direction. I can't remember the last time a superhero movie featured a band. It's that way with sci-fi and horror movies. Every time I think I'm going to see one of those movies, it's a monster movie, or one of those "It's alive!" monster movies. Bring Me the Horizon's Alan Day And Jonah Ray Join The Misfits" Now Full Length Live Show" Bring Me the Horizon's Alan Day and Jonah Ray appeared on an episode of "Monster Jam" called "Diego's D-O-N-E," which aired on July 5, 2016. The two played themselves as they performed as guests on some of the trucks from the show, while discussing the differences and similarities between "The Devilman" theme park ride they starred in on their "Count Your Blessings" album tour and the infamous "Misfits" ride at the Universal Studios Tour in LA. Recurrence of tonic-clonic, repetitive partial seizures as the initial manifestation of childhood acute lymphoblastic leukemia. A 9-year-old boy was referred to our hospital because of a recurrent cluster of myoclonic seizures. He was diagnosed as having acute lymphoblastic leukemia (ALL) (T-cell phenotype) after a bone marrow aspiration and biopsy. The first epileptic episode began 1 month after induction of chemotherapy. His electroencephalogram showed paroxysmal waves with frequent spike and wave complexes from the seizure onset. A brain MRI showed no evidence of brain tumor or central nervous system inflammation except for several subependymal lesions and leukoencephalopathy. About 11 months after his first seizure, he had another episode of tonic seizures. Tonic-clonic seizures with or without shortlasting myoclonic seizures recurred and disappeared simultaneously with the treatment for ALL. All epileptic episodes stopped without any side effect or recurrence. Treatment of ALL may induce epile
