Download 100MB to 1000MB.Q: jQuery: can i call custom method in click event like this? i am trying to achieve following. i have one input field. and when i click on that i want to get some text from somewhere in the browser. and when i press enter i want to get that text. i want this because i have large text that can be read only using keyboard eg: textarea, input field, etc i have this code `$(".type-ahead").click(function(){ var inputStr = getTextFromBrowsing(this); }); $(".type-ahead").keypress(function(e){ if( e.keyCode == 13 ) { if( inputStr ) { alert(inputStr); } } });` and i want to get the text as soon as i type something if i type lorem ipsum, then click enter then it should alert lorem ipsum this code works but only after i type something what i want to achieve is to get the text as soon as i press enter i think i can achieve this by using keypress but i am not sure how exactly please provide some advice! A: You can use: `$(".type-ahead").keypress(function(e){ if( e.which == 13 ) { if( inputStr ) { alert(inputStr); } } });` Q: What is the difference between Stave and Rocks? I have recently encountered the peculiar styling of a mine owner named the "St
