Motion capture technology's innovative capabilities improve the way players move and interact with each other in-game and help make the most out of FIFA 22's highly realistic physics engine. The new HyperMotion enables FIFA players to run up to 10km/h faster and deliver more radical runs, as well as increasing player control and effectiveness, especially in tight spaces. FIFA 22 will also introduce the "Next Gen Player Instincts" feature - a new Artificial Intelligence (AI) system that uses data from the millions of in-game interactions made by real-life players to give them even greater on-field awareness and ability to make the right decision at the right time. The "Hyper Motion" and "Next Gen Player Instincts" features are now live in FIFA 21 Ultimate Edition and FIFA 22. How will "HyperMotion" improve gameplay in FIFA 22? "HyperMotion" consists of four key technologies, which all work together to offer the most in-depth, realistic and dynamic football experience ever created. This includes: "Workhorse" - a new, high-speed running animation system that enables players to run up to 10km/h faster than ever before. "Sawtooth" - a technology that's used to make players move in constant, flowing energy through all their animations. For example, when a player jumps or runs, his legs are always moving on a sawtooth curve through the air. This enables them to keep the correct running line and remain balanced. "Wobble" - a technology that keeps players balanced on their feet through dynamic controls. When a player takes a clear shot, the movement of his arms and head isn't affected by movement outside of their immediate surroundings. "AI" - A new AI system that takes data from millions of in-game interactions performed by real-life players across games, seasons and competitions and uses it to give players even greater on-field awareness and ability to make the right decision at the right time. How does "AI" work? "AI" - a new AI system that takes data from millions of in-game interactions made by real-life players across games, seasons and competitions and uses it to give players even greater on-field awareness and ability to make the right decision at the right time. Features Key:

- **Game modes** - Career: Live your life as a player, there is no exact way to get from the junior leagues to the big leagues, nor are you guaranteed to achieve success. But with everything at your fingertips, there are more ways than ever for you to reach the top.
- Soccer overall: Today we made great strides by delivering a complete soccer game.
- Tackling, new "In-Your-Face" physics, and new Pass and Move:
 - Pass and Move, our physics technology, shows off some of the most immersive simulations in the game. Players will "float" in a realistic atmosphere, feel their hips knocking off the ball as they hit players and even absorb the force of impact - all before making their next move. Pass and Move will make sure players are never able to dodge teammates or clear the ball in stunning precision, never really giving themselves an easy opportunity to do so.
 - Realistic tackling: Did you miss the tackle? Can you still do with defenders, just as your heart beat right before your left foot landed on the ball? Tackle mode takes human-like physics to the next level. We have developed a new tackling system that will make you feel like the defensive option is the hardest choice to make every time you tackle a player. It will make defenders more reactive while protecting them from injuries.
- New ball control and feel : FIFA 22 is the most responsive and authentic soccer game yet, for the first time providing a really precise ball physics. This means you get the most authentic experience of playing the beautiful game.
- **Difficulty** - Player-friendliness: Use a controller, make your coach happy, face your friends on the TV...you're never alone! Chose from three difficulty levels when playing on the TV including the Technical and Behaviour, which unlocks new tackles, goals and animations, all manner of assists, etc.
- Advanced Connection Management: Competing with friends and other online players is easy. You can tell who is

online without using pointless connection meters.

- Download the De-Bug Football Manager to play FIFA 22 if you have passed the voice invite!
