One objective of this study was to conduct a pilot study on the variation of coarse (0-2.4 mm) root distribution within the semi-permanent floodplain of the lower Loire River in France. Secondly, the distribution of this root ensemble was characterized with respect to a previous study of fine roots (In the present financial system, banks create money out of thin air, as it were, when they make loans. This has worked for centuries because it's practically impossible to get caught, and many have earned a nice living off of giving away millions of dollars. It's a way to transfer wealth from the private sector to the public sector. Lately, the federal government has been creating a new currency called the United States Dollar, and it appears they are going to milk the system dry. The Financial Times reported that the Treasury Department is planning to issue an unlimited number of bonds that will become part of the US dollar, which many financial experts are describing as "demonetizing the US dollar."
