View and control Google Chrome features like speed, privacy and security. This extension helps you to take control of your personal data by modifying its settings. You can easily control the number of cookies stored in your browser. It also gives you a warning when a website is trying to access your history and removes those that you don't want. You can easily block phishing websites, place a padlock on the sites you trust, quickly clear your browsing history and much more. You can get a complete control over your privacy settings and enjoy a hassle-free browsing experience. You can even get notifications whenever you have a new tab open. With the 'Tabs' feature, you can manage multiple tabs at once. With a secure mode, you can easily open any site in private mode. SRWare Iron is the best privacy-focused browser alternative to Google Chrome. Hi2All, I don't think there's any need to download Chrome. That's what most of the tools do anyway and and I doubt that users will have problems with Chrome. It is not Chrome. It is a clone of Google Chrome. It is NOT meant for users that are having issues with Chrome. It is meant for users that want a privacy browser but do not want Google to know what they are doing online. I am using the Chrome for about a week now and I have found out what most of the tools do. This will save you time. Google tends to come out with a new browser every 6 months. So if that is the case with Chrome, then this extension will be good for you. Excerpt from their website: "Google has not yet added any features to Chrome that will save you time browsing the web. With our Chromium-based browser, SRWare Iron, however, we have the added advantage of providing all these features, but at a better speed than Google Chrome. SRWare Iron provides features that save you time and that Google hasn't offered yet such as tab management, document management, PDFs, secure browsing mode, and more." I have always been a stickler for privacy so I figured to give SRWare Iron a try. Sure enough, It works as advertised. In a nutshell, you will have more control over your Internet browsing experience. You will be able to change almost every aspect of your internet experience and get rid of all the unwanted and unwanted features that come with Chrome. Chrome is

## System Requirements:

Minimum: OS: Windows 10 64bit Processor: Intel Core i3 2.8GHz / AMD equivalent Memory: 6GB Graphics: GeForce GTX 560 1GB DirectX: Version 11 Hard Drive: 32GB available space (Recommended) Additional Notes: I only tested the game using an external monitor at 32" wide on my 27" Acer Thunderbolt monitor. A 27" 1440p monitor would probably provide a bit better viewing quality for a VR headset. You can check your system's specifications by pressing CTRL+ALT+
