After the installation completes, you will be asked to restart your computer. Once your computer has restarted, go to your Start menu and then to All Programs. Open the Adobe Photoshop folder and then locate the.exe file that you just installed. Double-click on it to open the installation software. Follow the on-screen directions to finish the installation. To activate the software using your original serial number, you can either go to the Activation page on the Adobe website or you can go to the Photoshop website. The Activation page for Photoshop on the Adobe website has a quick link to the Activation wizard. You can find the Activate Adobe Photoshop link on the top right-hand corner of the main Photoshop main page. Once you click on the link, you will be prompted to enter your serial number.
